SUMMARY

Mobile Developer with hands-on experience building Android applications using Kotlin, Firebase, REST APIs, and Kotlin Multiplatform. Experienced in real-time communication and scalable mobile UI development.

SKILLS

Technical Skills: Kotlin, Android SDK, Kotlin Multiplatform, Jetpack Compose, MVVM, Kotlin Coroutines, StateFlow
Backend and Database: Java, RESTful API, OkHttp, JSON, Firebase, JWT Authentication, WebSockets, MongoDB
Soft Skills: Problem-Solving, Communication, Team Collaboration, Adaptability

EXPERIENCE

Jogaz Info Pvt Ltd. **November 2025 – Present**
Android Developer, *New Delhi*

- Developed a Kotlin stock market application with real-time market data streaming using WebSockets, RESTful API integration with Java backend services, and optimised handling of live trading updates.
- Implemented JWT authentication, session management, and scalable mobile architecture focused on real-time financial workflows and performance.

Bright Infotech Pvt Ltd. **May 2025 – November 2025**
App Development Intern, *Remote*

- Integrated Kotlin frontend with FastAPI backend services for LMS workflows, API communication, and authentication handling.
- Developed mobile application features including offline AI inference, digital business card sharing, and automated follow-up messaging.

Paramount Infosystem Pvt Ltd. **November 2024 – May 2025**
Mobile App Developer Intern, *New Delhi, IN*

- Developed cross-platform mobile applications using Kotlin Multiplatform and Compose Multiplatform integrated with Java backend services.
- Integrated 10+ REST APIs for authentication, data handling, and backend-driven application workflows.

PROJECT

- **FitBridge .** Dual Flutter app for real-time trainer-member communication using Firebase, Riverpod, Hive, and Jitsi Meet. Implemented chat, appointment scheduling, video calls, session logging, and feedback workflows with shared modular architecture. (Link)
- **Air Chat.** Built a real-time chat application using Flutter and Firebase with user authentication and Firestore-based messaging. (Link)
- **Soil Health App**. Built a Flutter BLE application to monitor soil temperature and moisture data with Firebase Firestore, offline caching, and chart visualisation. (Link)
- **Smart Clinic Appointment System.** Developed an ASP.NET Core REST API for doctor appointment booking, scheduling management, and appointment status handling. (Link)

ACTIVITIES

- Participated in Soroban Build-A-Thon Hackathon, demonstrating teamwork and rapid prototyping under deadlines
- Attended Generative AI Workshop by GUVI-HCL & Intel at IIT Delhi, gaining exposure to cutting-edge AI tools

EDUCATION

Master's of Computer Applications, GGSIP University ***Expected 2027***
Relevant Coursework: Data Structures, DBMS, Operating Systems, Software Engineering
